ADITHYAN DS

Full Stack Developer | MERN Stack | React.js | Node.js

Kollam, Kerala | +91 8590559433 | adithyands060@gmail.com | github.com/adithyan-ds | linkedin.com/in/adithyands | my-portfolio-amber-three-96.vercel.app

PROFESSIONAL SUMMARY

Results-oriented Full Stack Developer with a B.Sc. in Computer Science and a certified 6-month MERN Stack Development program. Experienced building scalable React.js frontends, Node.js/Express.js REST APIs, and MongoDB/PostgreSQL backends. Delivered production-grade web applications across healthcare, e-commerce, and AI domains with JWT-based authentication, role-based access control, and third-party API integration. Eager to contribute to agile, product-focused engineering teams building efficient, user-centered software solutions.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Context API, React Hooks
Backend: Node.js, Express.js, RESTful API Design, Python, Django, MVC Architecture
Databases: MongoDB, PostgreSQL, Mongoose ODM
Authentication & Security: JWT (JSON Web Tokens), Role-Based Access Control (RBAC), Bcrypt
State Management: React Context API, useState / useReducer
Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Hugging Face API
Testing & Debugging: Postman (API testing), Browser DevTools, Console debugging
Concepts: Agile / Scrum, CI/CD (basic), MVC, Responsive Design, Cross-Browser Compatibility

PROJECTS

Health Care Management System *MERN Stack · JWT · Role-Based Access Control*
health-tech-platform-two.vercel.app

- Engineered a full-stack healthcare platform supporting 3 user roles (patient, doctor, admin) with JWT-based authentication and dedicated dashboards, reducing unauthorized access risk through strict RBAC middleware.
- Implemented appointment scheduling, digital prescription management, and real-time status update modules, cutting manual coordination overhead by an estimated 40% compared to a manual workflow.
- Deployed on Vercel (frontend) and Render (backend) with environment-secured API keys and MongoDB Atlas for cloud database management.

AI Sentiment Analysis Web App *MERN Stack · Hugging Face NLP API · REST API*
sentiment-analysis-murex-beta.vercel.app

- Integrated Hugging Face NLP inference API into a full-stack MERN application delivering sub-2s real-time sentiment scores, with server-side API key handling to prevent client-side credential exposure.
- Designed a responsive React.js UI with optimized frontend state management, enabling instant sentiment feedback on user-submitted text without full-page reloads.
- Built a secure Express.js proxy layer to abstract external API calls, improving maintainability and protecting third-party credentials.

AI-Powered Crop Yield Prediction System *Python · Django · PostgreSQL · Machine Learning*

- Architected a Django-PostgreSQL smart agriculture platform consuming live weather REST APIs and IoT soil data feeds, enabling ML-driven crop yield predictions across multiple crop types.
- Incorporated plant disease detection module, admin dashboard analytics, and an e-commerce module with payment gateway integration and order tracking, delivering an end-to-end agricultural management solution.
- Designed normalized PostgreSQL schema to efficiently store sensor readings, prediction logs, and transactional data, supporting analytical queries across multiple data sources.

React E-Commerce Platform *React.js · Context API · Admin Dashboard*

react-ecom-admin-dashboard.vercel.app

- Built a fully responsive e-commerce frontend in React.js with role-based access control for customer and admin roles, using Context API for global cart and auth state management.
- Developed an admin dashboard featuring real-time inventory tracking and sales analytics, enabling data-driven decisions for product and order management.
- Implemented protected routes and conditional rendering to enforce RBAC, ensuring admin-only modules are inaccessible to standard users.

CERTIFICATIONS

Full Stack Development — MERN Stack | 6-Month Professional Certification Program *2026*

EDUCATION

Bachelor of Science in Computer Science *Graduated: January 2025*

Kerala University

KEY STRENGTHS

Full-stack application architecture · REST API design & integration · Responsive UI development · Authentication & authorization systems · Agile development mindset · Cross-functional collaboration · Rapid learning & self-directed skill development
