SUMMARY

Dynamic and results-driven B.Sc. Computer Science graduate with a six-month Full Stack Development certification, showcasing expertise in front-end technologies such as React and robust back-end development using Node.js and Express. Possesses a solid understanding of RESTful APIs, database management with MongoDB, and proficient use of Git for version control. Strong problem-solving abilities and a genuine eagerness to quickly learn new technologies drive a commitment to delivering innovative web solutions. Prepared to contribute effectively in collaborative environments while tackling complex challenges in software development.

SKILLS

TECHNICAL

- **Frontend development with React.js and modern web technologies**
- **Experience in building backend applications using Node.js and Express.js**
- **MongoDB database management**
- **Collaborative teamwork**
- **Adaptable learner**
- **Experienced in software utilization**
- **Analytical problem-solving**

EDUCATION

JANUARY-2025

BACHELOR OF SCIENCE: ComputerScience

Kerala University

- FINAL GRADE: 61%
- AI-POWERED CROP YIELD PREDICTION SYSTEM - CAPSTONE PROJECT

PROJECTS

AI-Powered Crop Yield Prediction System

- **Built a full-stack intelligent agriculture system using Python, Django, and PostgreSQL with role-based access for farmers, public users, and government authorities.**
- **Integrated OpenWeatherMap API and IoT soil sensor data for real-time environmental monitoring and prediction accuracy.**
- **Implemented image-based plant disease detection, RESTful APIs, and mobile compatibility for broader accessibility.**
- **Designed an interactive dashboard with data visualization, alerts, and personalized recommendations for farm decisions.**
- **Enabled e-commerce functionality with secure payments and order tracking for public users.**

React E-Commerce Platform with Admin Dashboard

- **A fully responsive e-commerce web application built using React with user and admin role-based access. Includes shopping cart, order management, and real-time admin analytics with charts.**
- **Built reusable React components and implemented state management using Context API**
- **Developed user authentication, order tracking, and dynamic cart updates**
- **Implemented an admin dashboard showing live product, user, and sales insights**
- **Deployed the application using Vercel for publicly accessible hosting.**

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
